

Let the wild Animals Free

Welcome to the Jungle

How about playing and learning a little bit about wild animals.

Wild animals are all animals that live in jungles, forests, savannahs
And should not be domesticated.

Children usually get to see them in the zoo or theme parks. So we want
them to see animals in their regular habitat.

The goal of this unit is to teach children about wild animals and make
them discover why they can't be domesticated and where should they
live, in the zoo or in the jungle / forest / savannah.

Songs suggestions:

- * [Walking in the Jungle](#)
- [The Animal Boogie](#)
- [Down in the Jungle](#)—song with movements.

Story suggestions:

- [Rumble in the Jungle](#)
- [Wild Animals in the Jungle](#) - This story has no dialogues, but lots
of opportunities for enquiring the children about the animals they
see, colors, quantities, and encourage them to make their inference
about the movie.

Can you draw a Rhino?

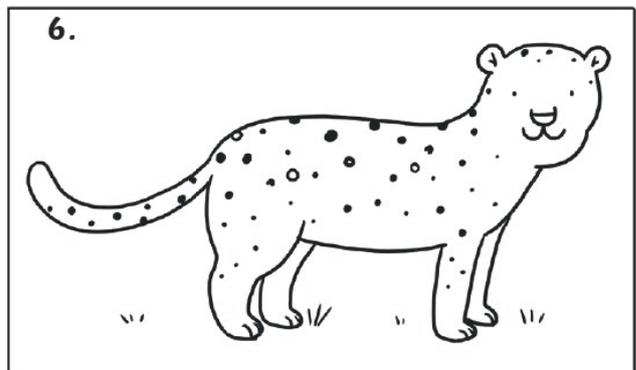

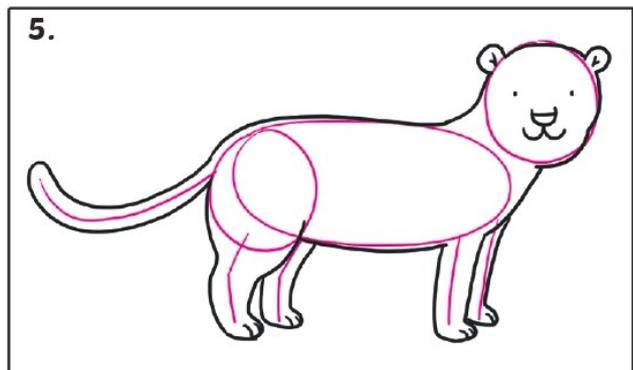

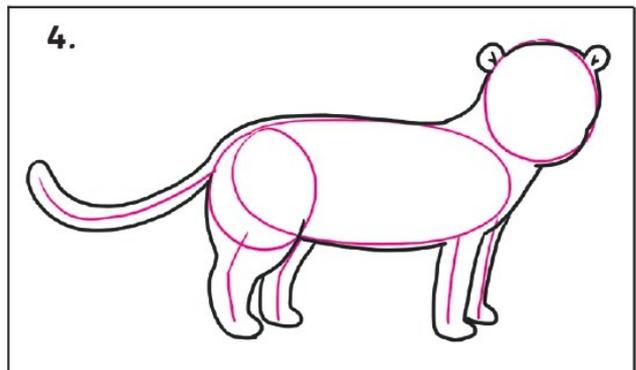

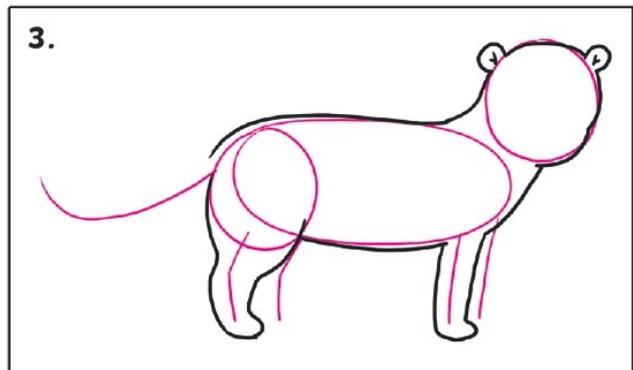

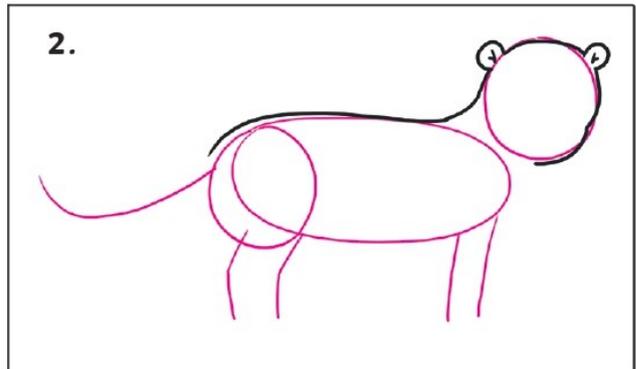

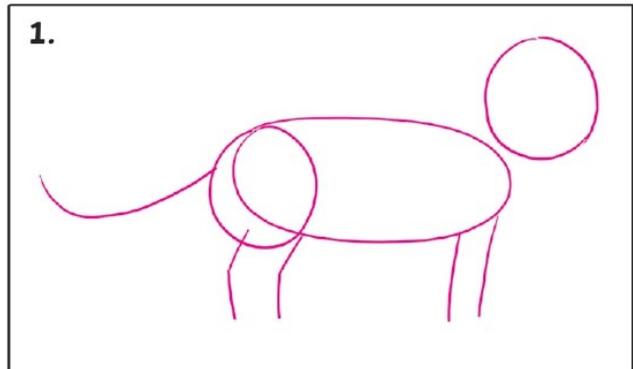

Follow the steps and draw your own rhino.

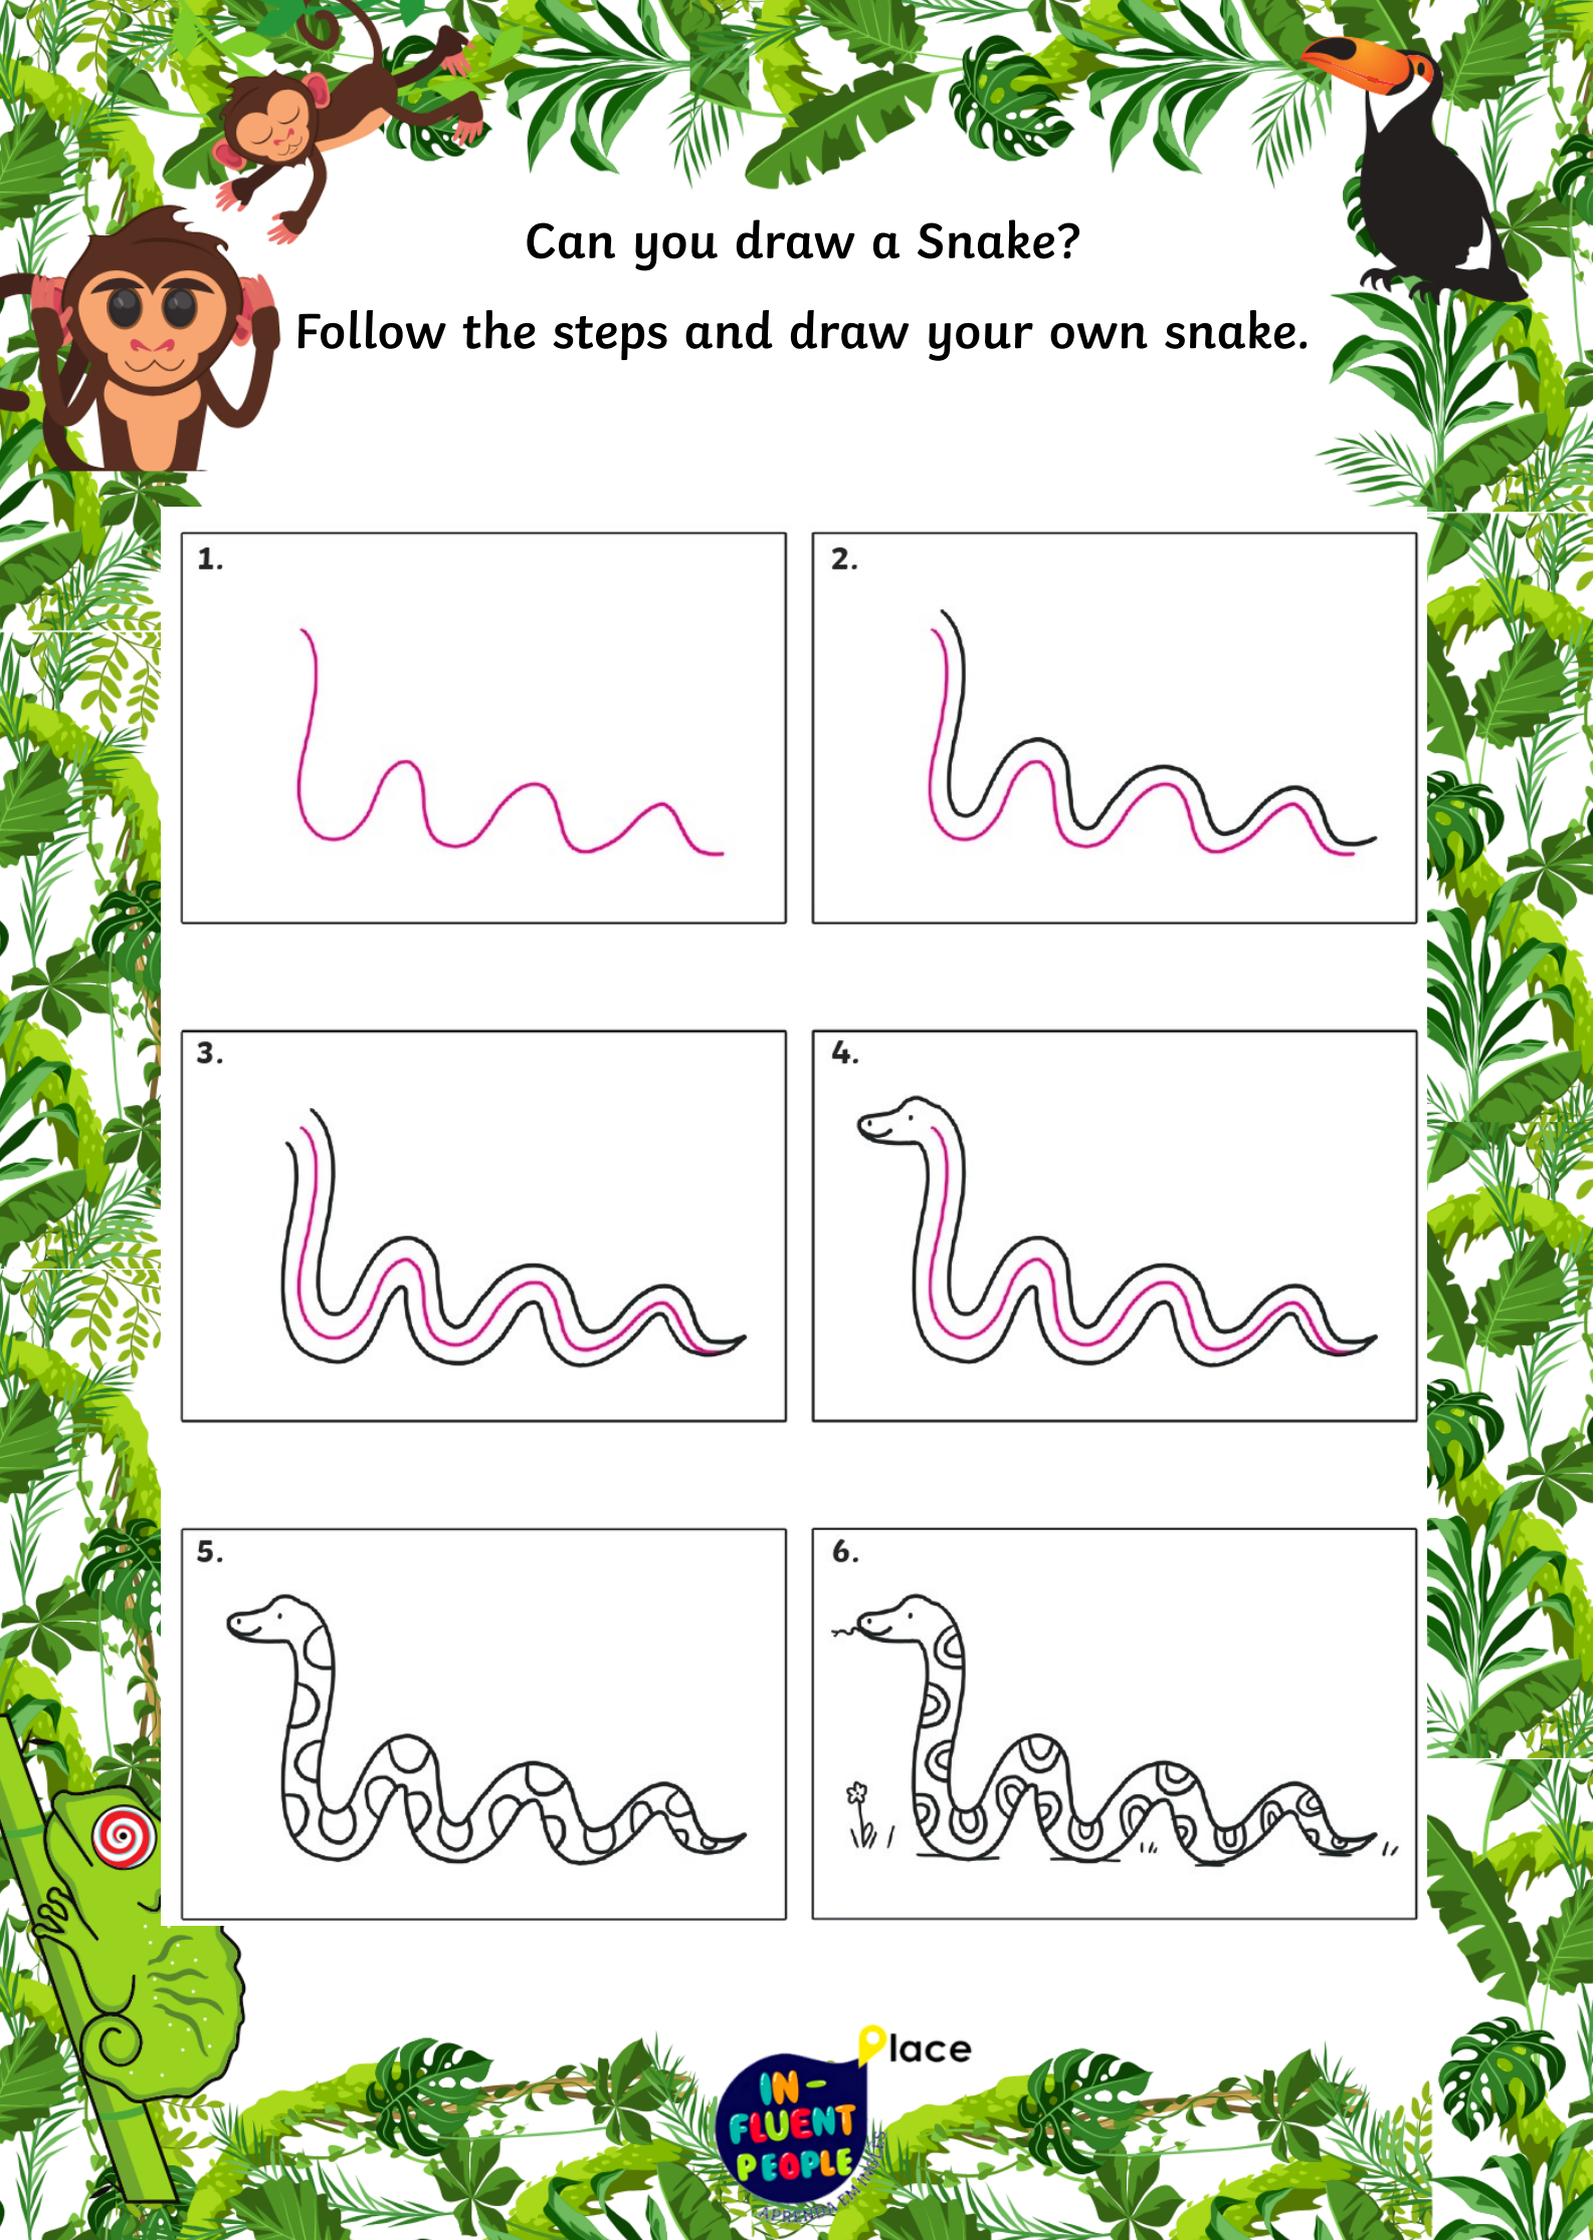

Can you draw a Lepard?

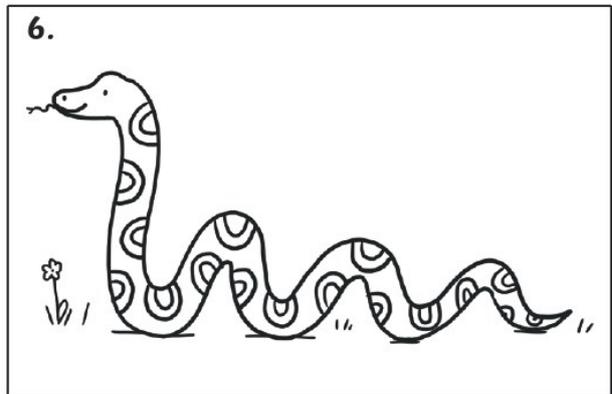

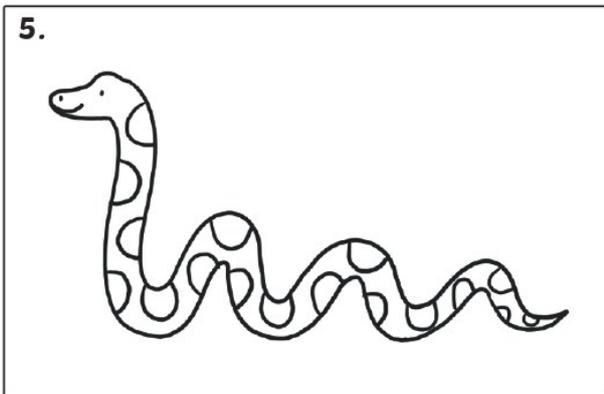

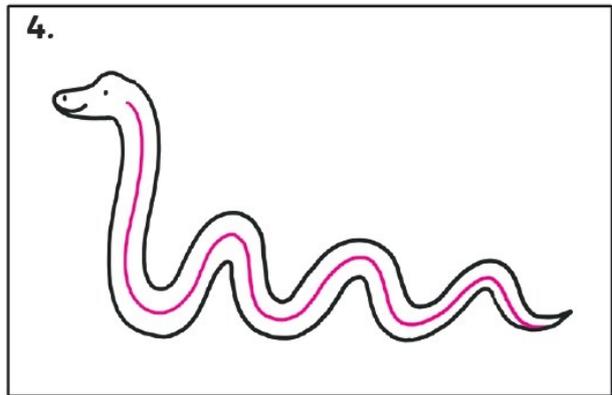

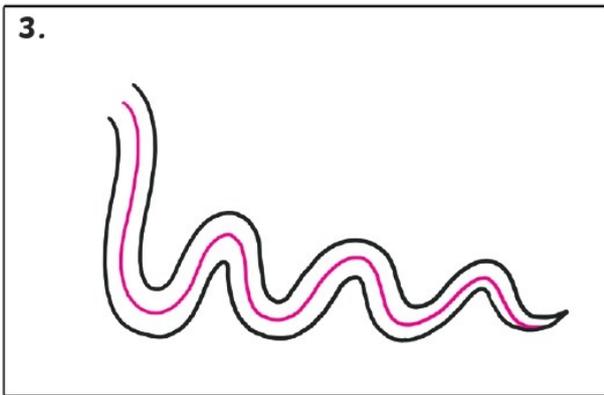

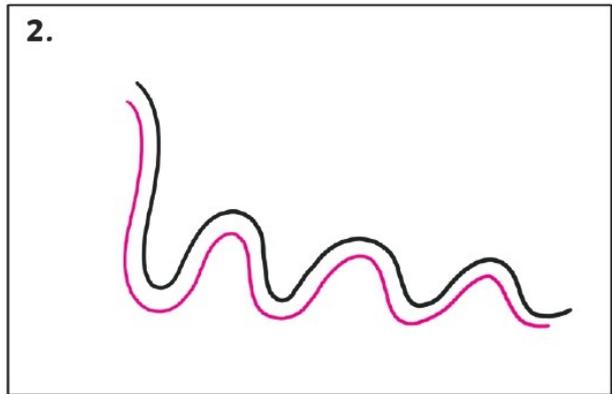

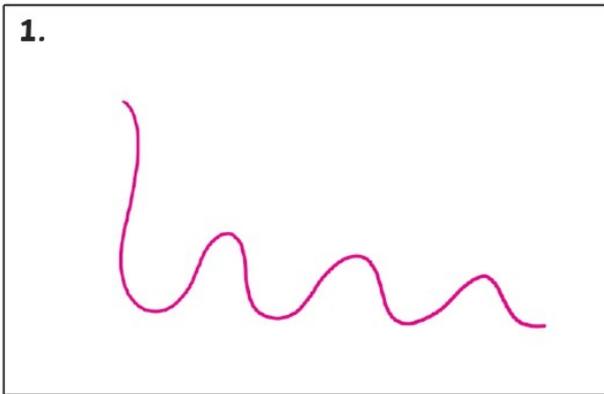

Follow the steps and draw your own lepard.

Can you draw a Snake?

Follow the steps and draw your own snake.

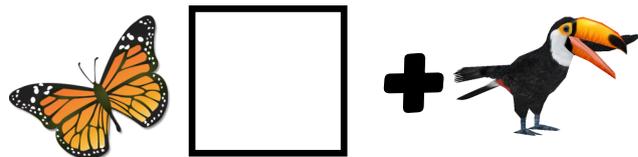

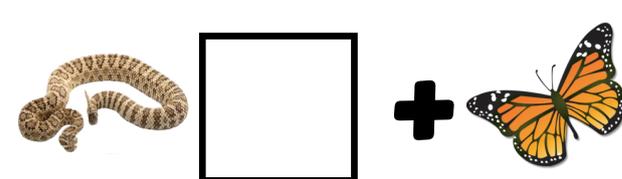

I spy with my little eye.

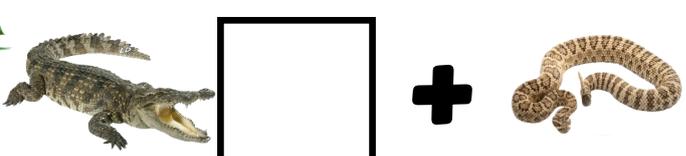

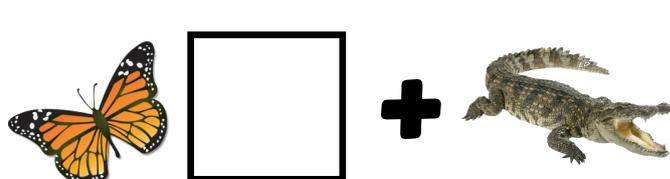

I SPY— ADD TO 20

$$\square + \text{frog} \square = \square$$

$$\square + \text{toucan} \square = \square$$

$$\square + \text{butterfly} \square = \square$$

$$\square + \text{snake} \square = \square$$

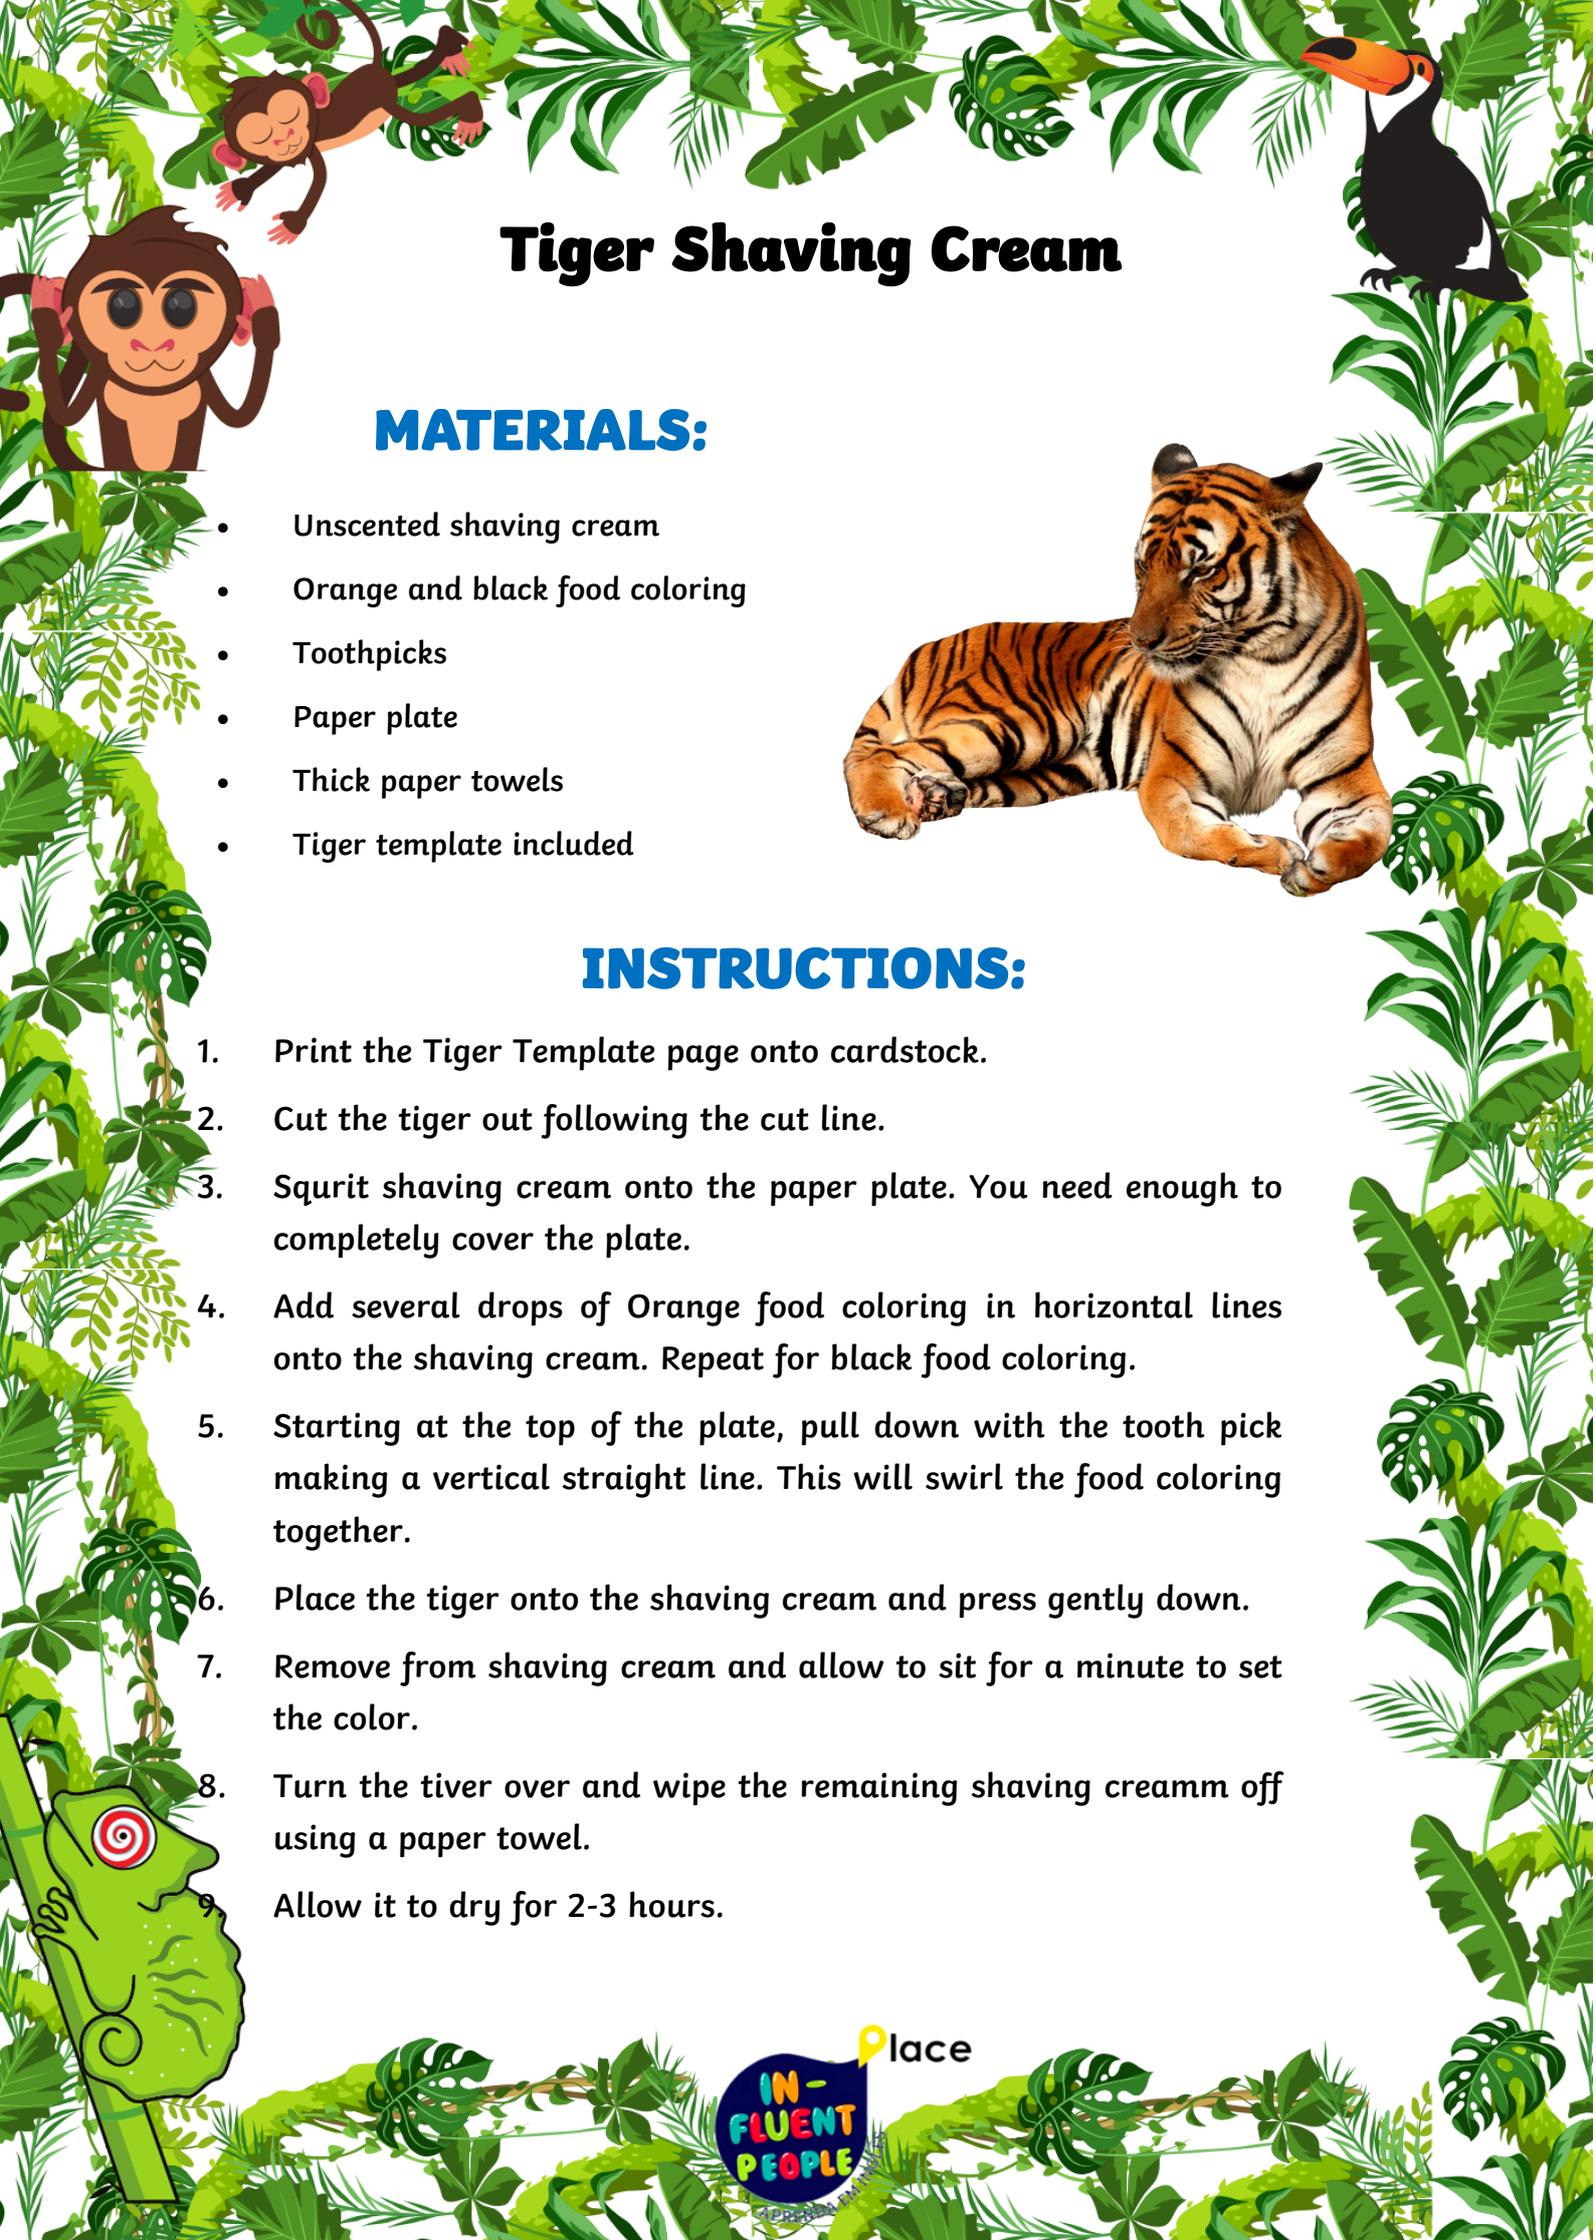

$$\square + \text{alligator} \square = \square$$

Handprint Wild Animals

Using tempera paint and a hand , go wild making different animals. See below some ideas. What other animals can you make?

Tiger Shaving Cream

MATERIALS:

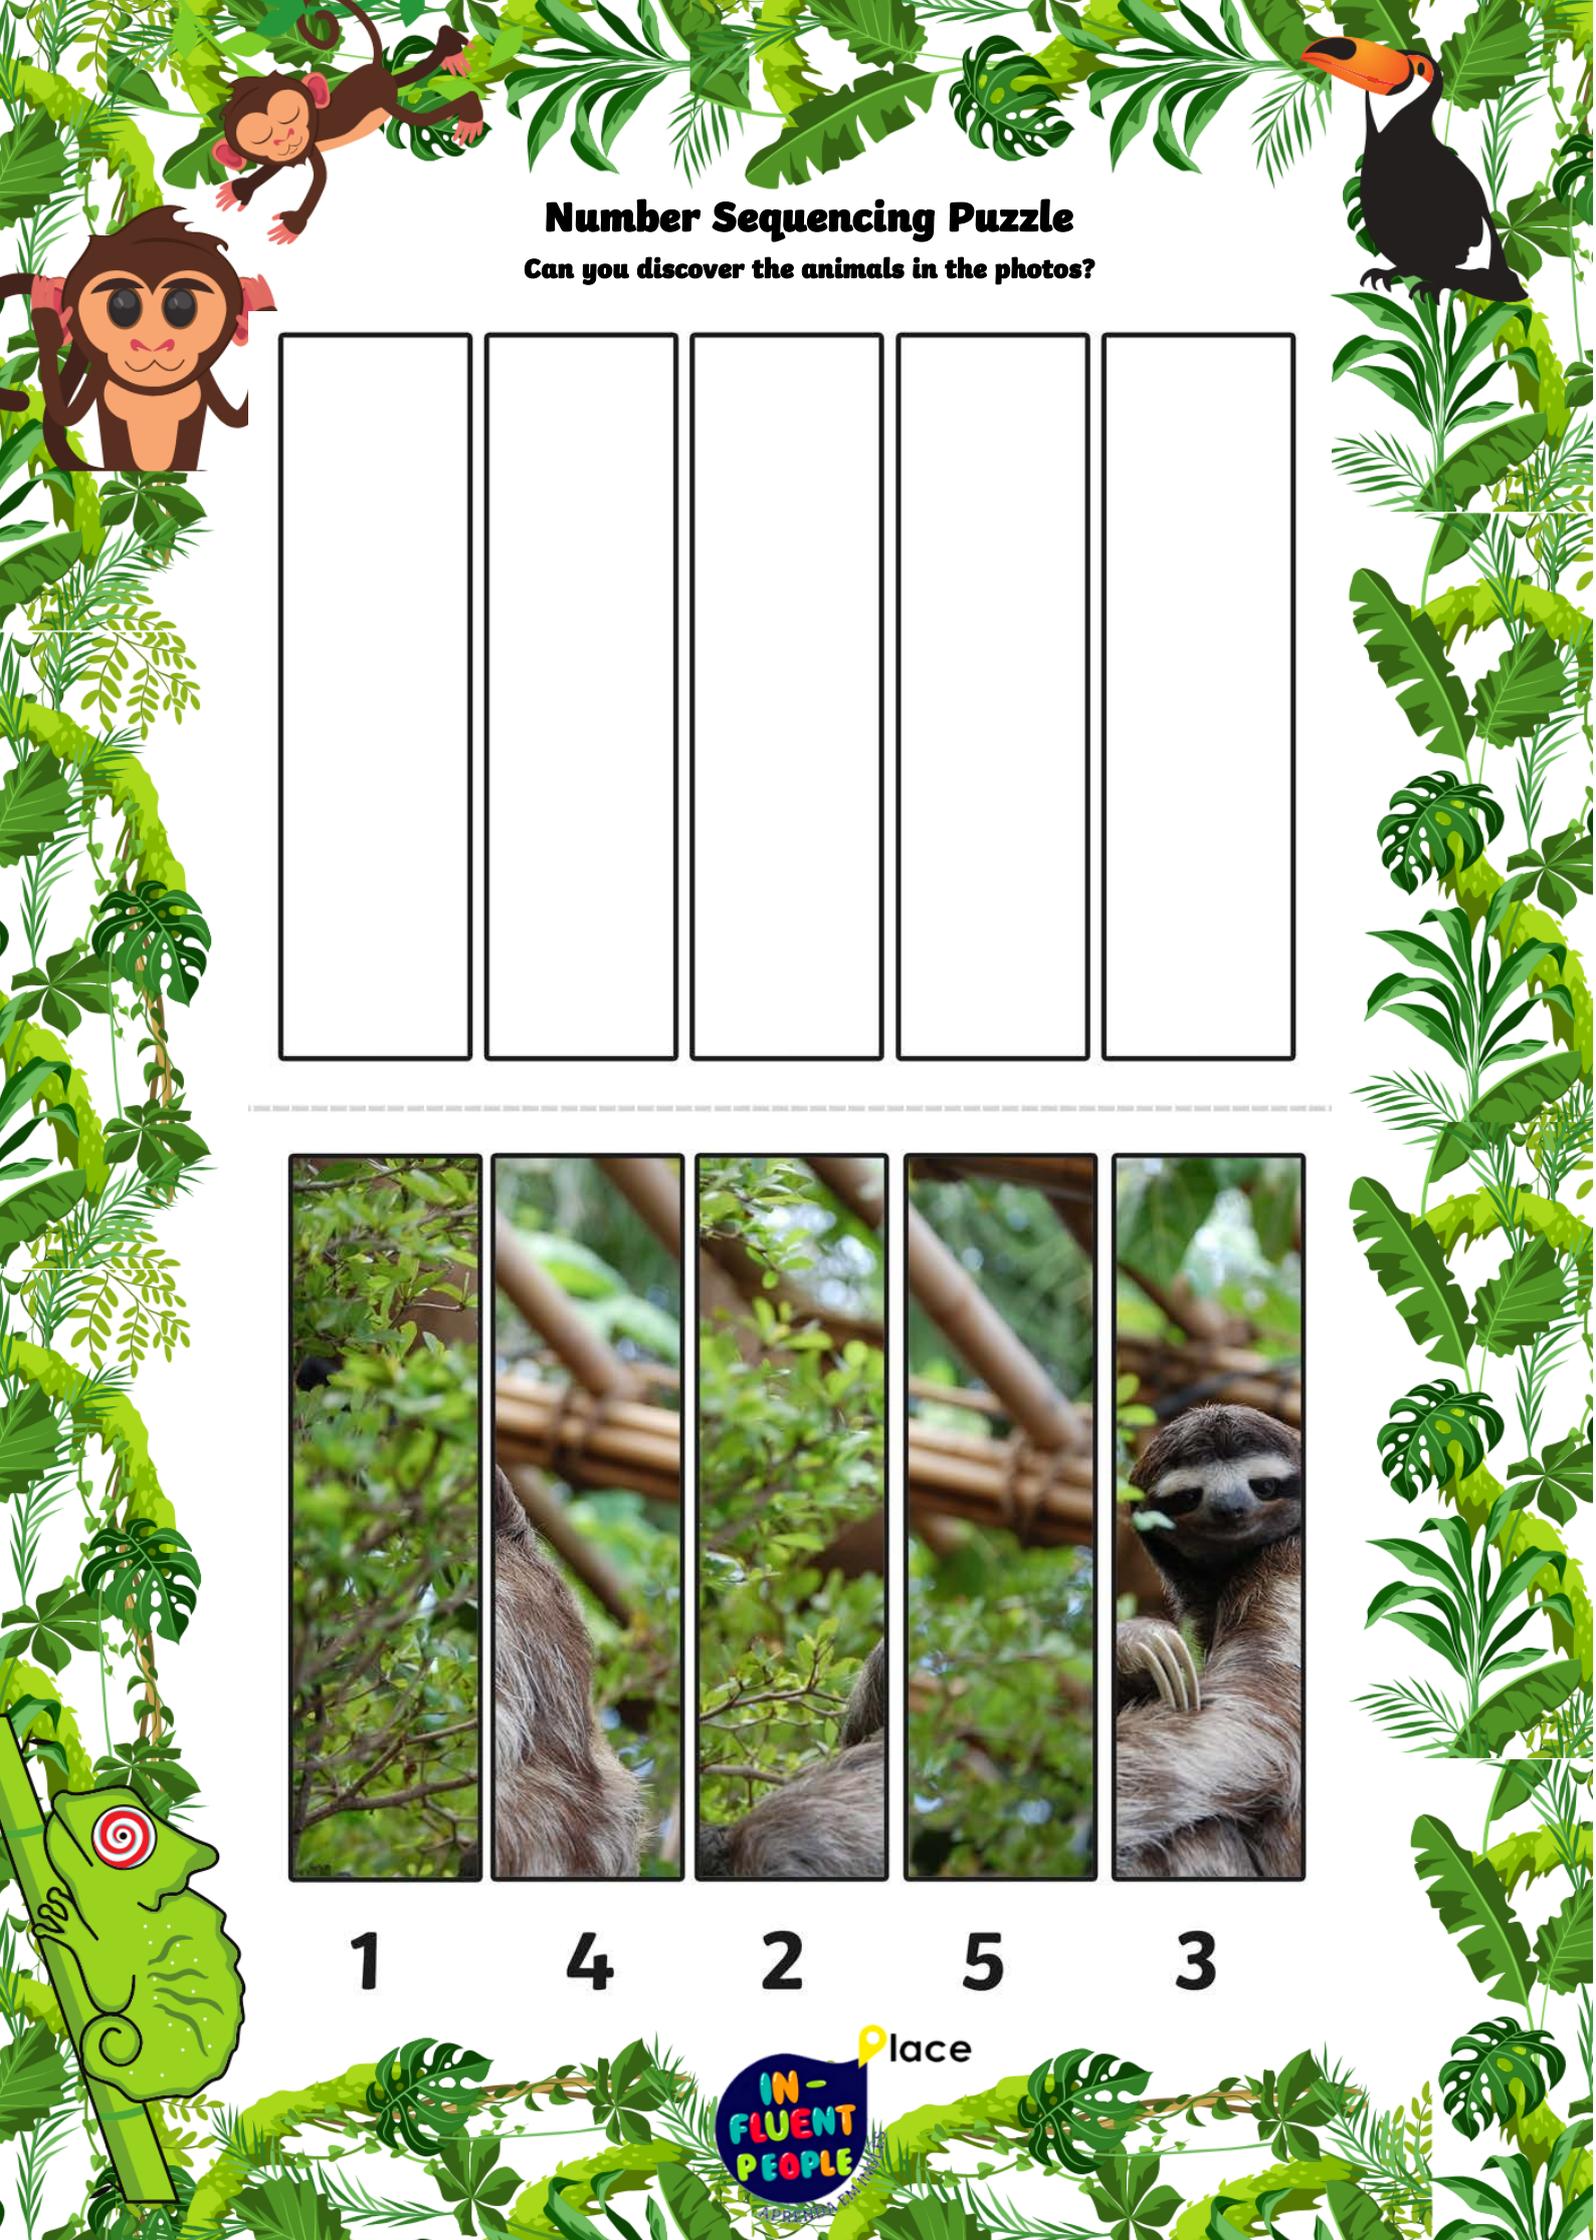

- Unscented shaving cream
- Orange and black food coloring
- Toothpicks
- Paper plate
- Thick paper towels
- Tiger template included

INSTRUCTIONS:

1. Print the Tiger Template page onto cardstock.
2. Cut the tiger out following the cut line.
3. Squirt shaving cream onto the paper plate. You need enough to completely cover the plate.
4. Add several drops of Orange food coloring in horizontal lines onto the shaving cream. Repeat for black food coloring.
5. Starting at the top of the plate, pull down with the tooth pick making a vertical straight line. This will swirl the food coloring together.
6. Place the tiger onto the shaving cream and press gently down.
7. Remove from shaving cream and allow to sit for a minute to set the color.
8. Turn the tiger over and wipe the remaining shaving cream off using a paper towel.
9. Allow it to dry for 2-3 hours.

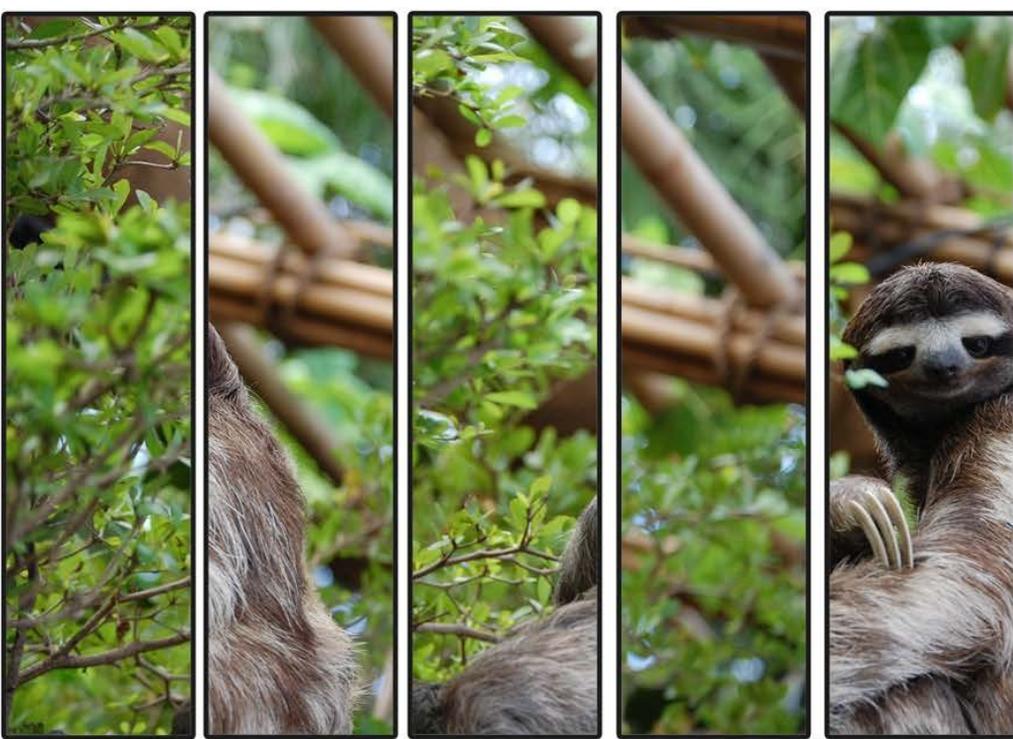

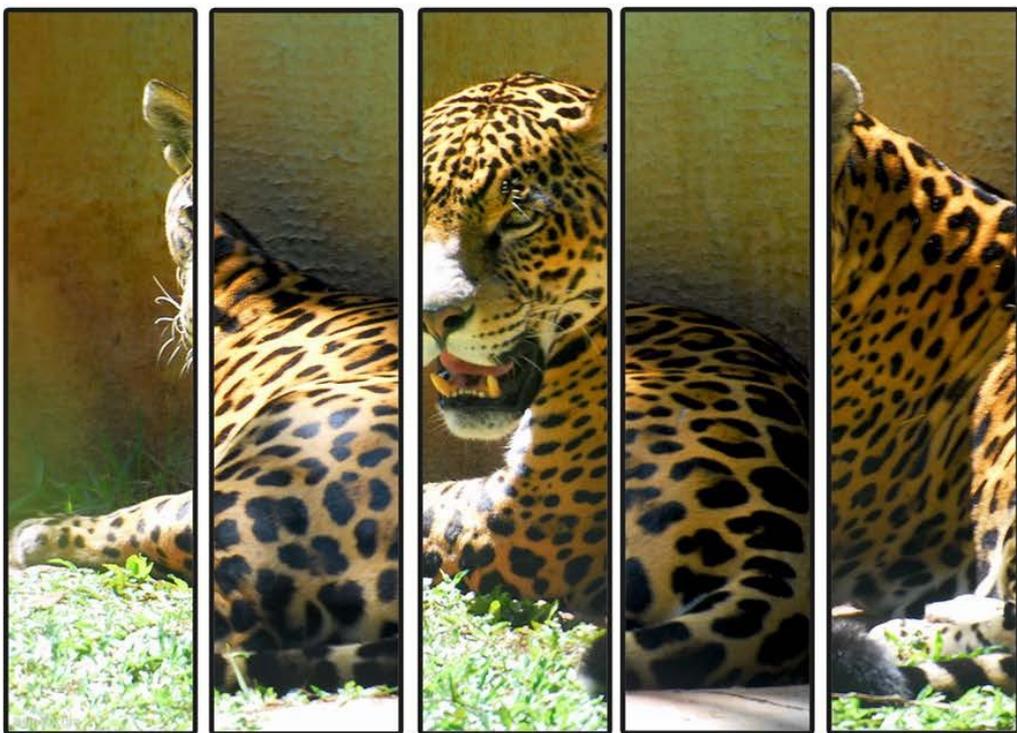

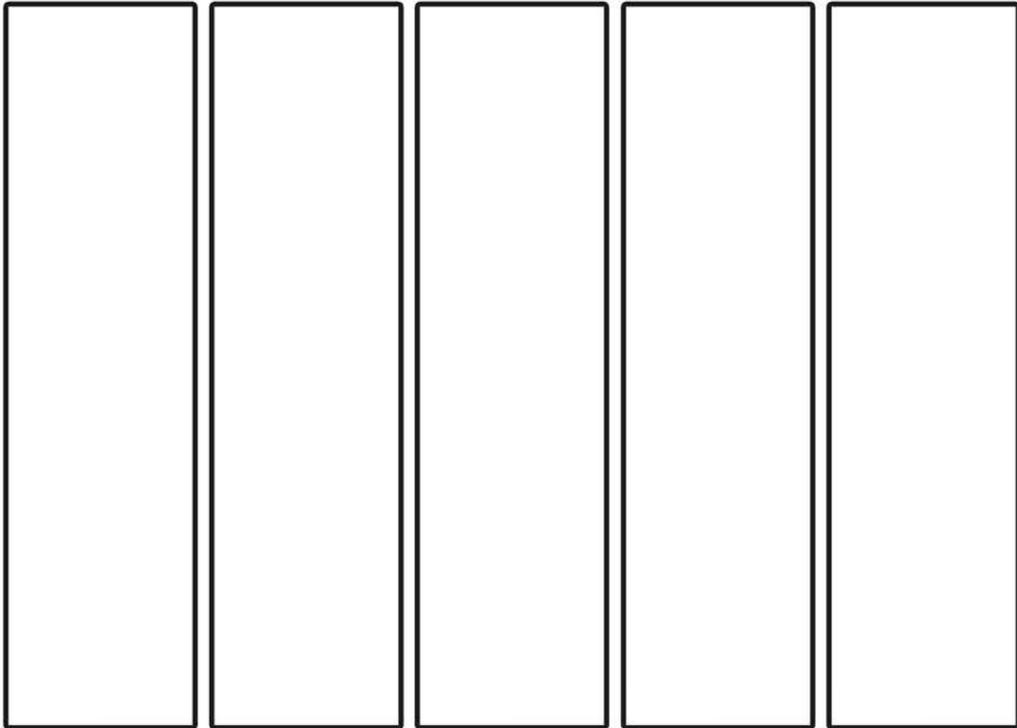

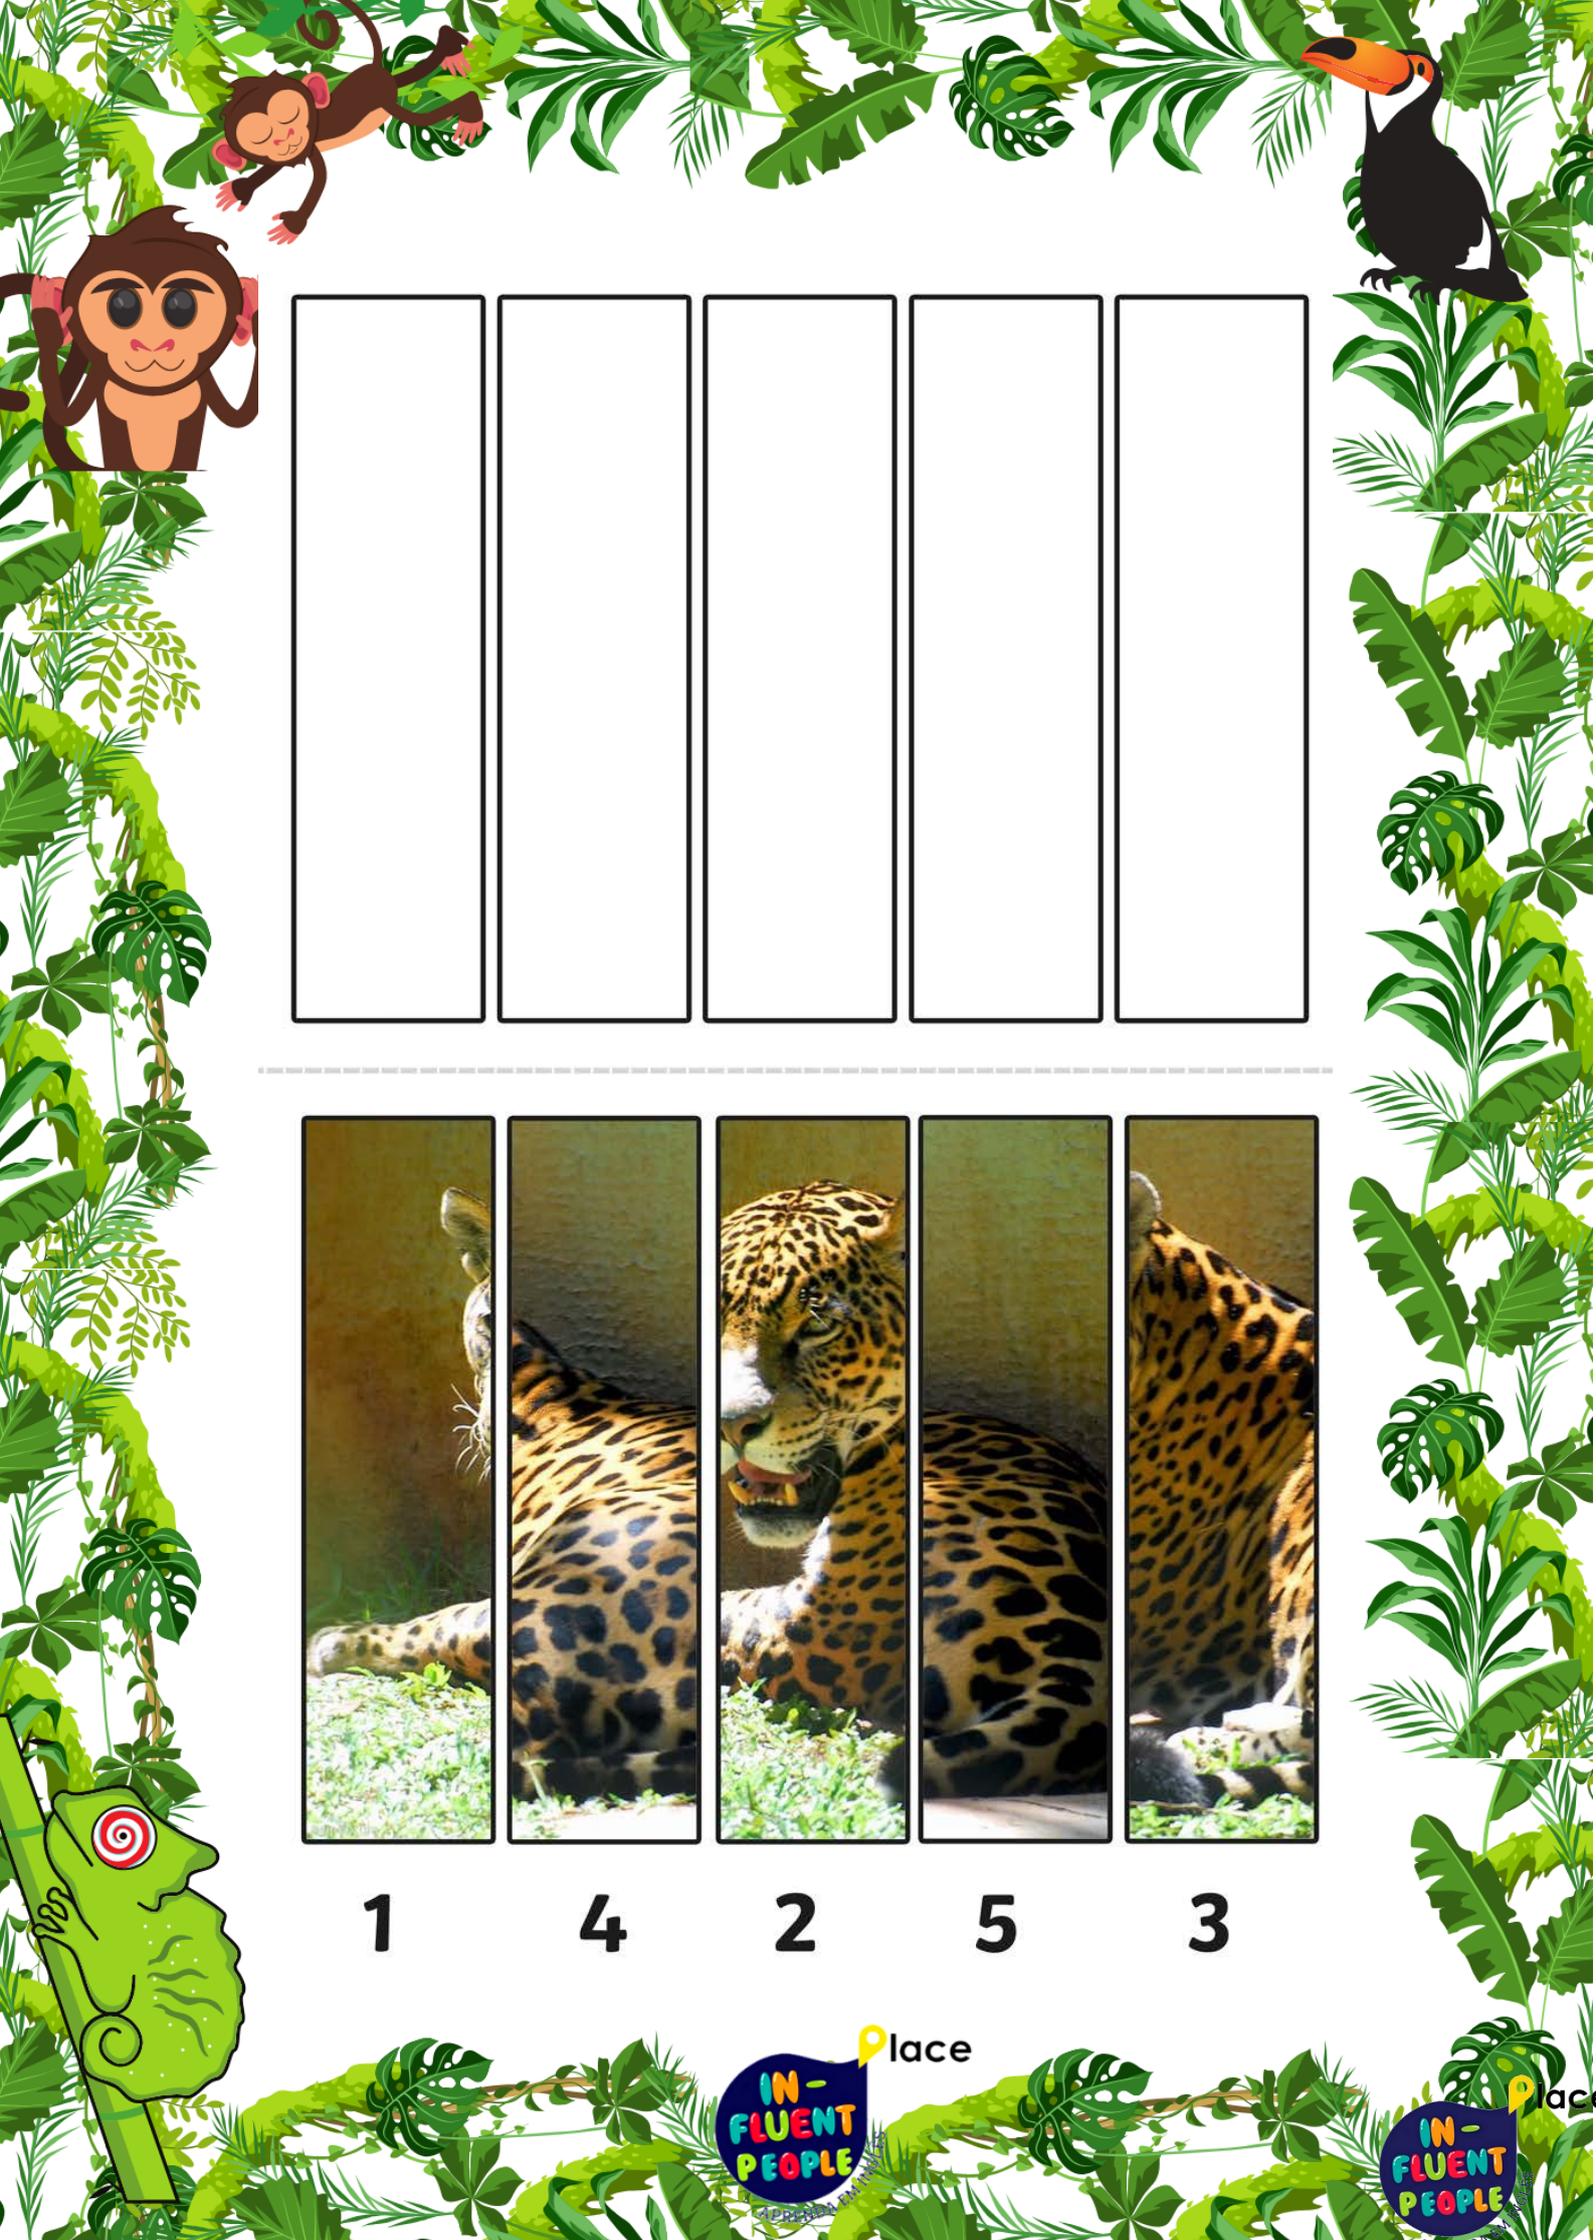

Number Sequencing Puzzle

Can you discover the animals in the photos?
